Fenix MiniPASS

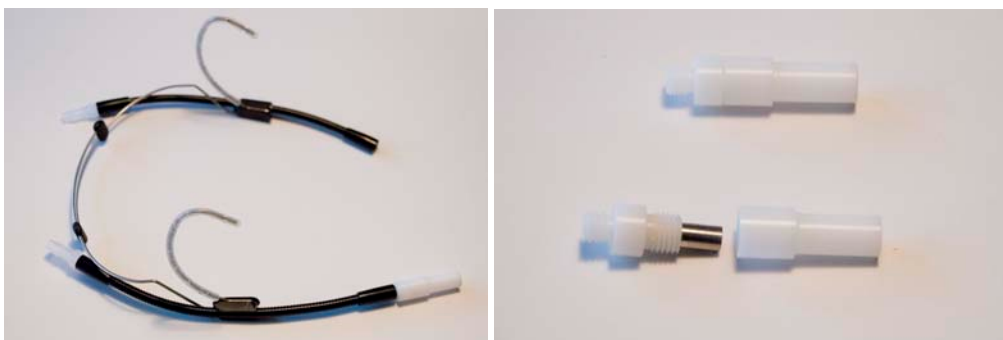

“Miniaturized Personal Air Sampling System”

The system for true breathing zone measurements

- Convenient, adjustable head-set.
- Double flexible sampler holders with Luer quick connections
- Can easily be integrated with hearing protection head-set
- For passive (diffusive) and pumped sampling.
- Can be used with a large number of pumped and passive samplers for particles, vapors and gases.
- All sample holders (flex-tubes) with connections are individually leak tested to 100 kPa

Example of samplers that can be used with FENIX MiniPASS:

- FENIX Mini Passive Thermal Desorption Sampler (MiniATD)
- FENIX Formaldehyde Pumped Sampler (13 mm Swinnex sampler)
- FENIX Polyamine Pumped Sampler (13 mm Swinnex sampler)
- FENIX pumped sampler for hydroquinone/benzoquinone (13 mm Swinnex sampler);
- Standard and modified 25 mm or 13 mm filter samplers for aerosols
- Standard “charcoal-type” adsorbent tubes;
- SKC 575 passive sampler;
- SUPELCO BPE-DNPH pumped samplers for ozone and aldehydes
- WATERS SEP-PAK DNPH pumped samplers for aldehydes

MiniPASS med Mini ATD passiv provtagare

Now only 1300 SEK + VAT for a complete system with a headset, double flexible sample holders with pump tube adapters and Luer connectors for comfortable connection of various samplers
